

Sure to be Safe

SHI
Calliper Brake

Caliper-Brake for low speed shaft of Hoists in Container Cranes and Hot Metal Cranes

Technical Description

Applications

Suitable as emergency back-up brake in heavy duty applications such as container cranes, hot metal cranes, conveyors and cable cars

Design Advantages

- Fast response time for maximum safety
- Suitable for various disc thicknesses
- No tangential forces transferred onto seals and piston
- Virtually wear and maintenance free due to unique design using one hydraulic seal per cylinder only
- Fast and easy readjustment of pad wear
- Fast and easy lining replacement and wear

Options

- Switches for position indication and pad wear monitoring
- Hydraulic power packs
- Mounting stands
- Disc cleaning brushes
- enclosures

Main Types and Torque Ranges
